

Church Community Results from the Viewpoint Survey

We sent viewpoint questionnaires to 240 people who were either members of our Electoral Roll, and/or members of our planned giving schemes, and /or recognised as regular attendees at church. There were 88 respondents which is similar in number to our average weekly adult Sunday attendance. Some respondents said they attended more than one service, but where we have been able we have attributed their response to what appears to be the service they comment on most frequently.

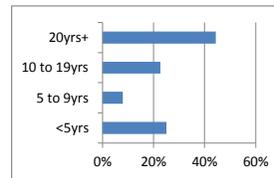

We are a broad and inclusive church so we expected and received a wide spectrum of views and opinion. For example, respondents in the same age band and from the same service often expressed differing views on the same issue.

This report includes a large amount of data in individual tables but for easier appreciation we have also included charts alongside or below many of these tables from question 11 onwards which show the proportion of satisfaction or positive comment in blue and dissatisfaction or concern in red or maroon. However, the proportions in each chart have to be viewed in the context of the number of respondees e.g. where an answer is given by one person but they are the only responsee from a service answering that question the proportion will be 100%.
